## **I-25 RESURFACING PROJECT SET TO RESUME**

**DOUGLAS COUNTY** – The Colorado Department of Transportation (CDOT) begins a four-mile paving project on Interstate 25 between Douglas Lane (Castle Rock south city limit) and Tomah Road tonight. Work originally started in May 2008, but shutdown last summer due to an asphalt shortage.

**In addition to asphalt paving, work includes rotomilling, bridge expansion joint replacement, new rumble strips, seeding and erosion control work.**

Drivers can expect single lane closures at various locations on northbound *or* southbound I-25 during the following time periods:

### **Northbound**

- Sunday from 9 p.m. to 5:30 a.m.
- Monday through Thursday from 7 p.m. to 5:30 a.m.

### **Southbound**

- Sunday from 9 p.m. to 6:30 a.m.
- Monday through Thursday from 8 p.m. to 6:30 a.m.

Drivers should anticipate delays and a reduced 45 mph speed limit during project hours. Vehicles wider than 12 feet also will be restricted from traveling through the work zone. The speed limit will return to 75 mph during non-work hours.

Motorists are reminded to please *Slow for the Cone Zone*, stay alert and pay attention to and obey all work zone/advisory signs and flaggers.

**The project includes repairs to the anti-icing system on the northbound I-25 between the Upper Lake Gulch Road and Union Pacific Railroad bridges – a system that allows deicers to be applied to the highway and bridges remotely by CDOT Maintenance or as determined by sensors within the road surface. An expansion joint also will be replaced on the UPRR overpass.**

Premier Paving, Inc. of Denver, CO is the contractor for the \$3.2 million project. It is scheduled for completion in August 2009.

Traffic information about this or other CDOT projects is on the *cotrip.org* website or by calling 511 statewide.
